Healthcare organizations have a valuable opportunity to assess their progress toward the ICD-10 implementation finish line.

Wherever you’re at, AHIMA has the solution to meet your unique needs.
How far have you come on the run to ICD-10?

Leverage AHIMA’s well-established expertise and knowledge in the clinical coding industry, including best practices for adult professional education.

Our ICD-10 product suite is designed to provide a full spectrum of rigorous yet flexible learning opportunities for staff development in a variety of roles, and proficiency levels.

Get Up To Speed

Checkpoint
- Have an ICD-10 training plan
- Identified staff training needs
- Have not started training

Solutions
Evaluate your coders’ current foundational knowledge, identify training needs, create training experts, and fill the knowledge gap with trusted, flexible, and rigorous training solutions to get your coder workforce up to speed.

Keep Your Team Going Strong

Checkpoint
- Have trained coding staff to basic competency but need to get stronger
- Have not trained clinical staff

Solutions
Now that you’ve got the basic skills in place it’s important not to lose momentum. Step up your coder training program to strengthen coding skills and put your clinical staff into the position.

Reach New Heights

Checkpoint
- Have trained coding staff to advanced competency and need to keep them strong
- Have trained coding staff but need to cross-train or further emphasize CDI

Solutions
You’ve trained hard but need to keep working to maintain your edge.

Solutions
Evaluate your coders’ current foundational knowledge, identify training needs, create training experts, and fill the knowledge gap with trusted, flexible, and rigorous training solutions to get your coder workforce up to speed.

• Evaluate A&P Foundation Knowledge with Online Readiness Assessments
• Create Expert Trainers or Coders with Coding Academy Onsite Sessions
• Establish a firm foundation for ICD-10 learning with Online Foundation Courses
  - Anatomy and Physiology
  - Medical Terminology
  - Pathophysiology and Pharmacology
• Learn the basics about ICD-10-CM/PCS with Online Courses for Coders
• Stay up to date with Webinars/Learning On Demand Sessions

• Measure your progress with Coding Proficiency Assessments
  - ICD-10-CM/PCS and CDI
• Take online assessments and follow-up with related courses where additional training is needed with ICD-10 A&P Focus Training
  - Neoplasms
  - Pregnancy, Childbirth, and the Puerperium
  - Circulatory System
  - Respiratory System
  - Central and Peripheral Nervous System
  - Musculoskeletal System
• Complete AHIMA Clinical Documentation training and certification for CDI Specialists

• Apply what you’ve learned with online ICD-10 Coding Practice Cases by setting:
  - Physician Office
  - Home Health
  - Hospital Outpatient
  - Long Term Care
  - Hospital Inpatient
  - Surgical
• Checkpoint your progress with Online ICD-10 CM/PCS Post Training Assessments
• Stay up to date by browsing the Coding Hot Topic Webinar Library

Coder/CDI

Physician
• Clinicians complete overview and introductory modules in Clinical Documentation for ICD-10 By Specialty: Principles and Practice

Physician
• Physicians complete Top 10 primary and secondary conditions/diagnoses in Clinical Documentation for ICD-10 By Specialty: Principles and Practice

Physician
• Physicians use mobile support from ICD-10 by Specialty: Principles and Practice for performance support and reinforcement of learning.
